Drilling increases substantially

Pushing the boundaries

Activity in the Greater Kaybob area is picking up with completions intensity increasing in the post-pandemic era, down from around 54 in the first quarter of 2021 compared with 61 in 2020. Licensing declined somewhat in Q1 2022, likely due to weather-induced delays in completions.

First quarter 2022 daily average production in the area to plateau at around 12,300 bbls/d, up 4,500 boe/d from year-end 2021. Production from operators Vesta Energy and Artis Exploration has recovered after being shut-in during the early phase of the Covid pandemic and exited 2021 at 15,305 bbls/d.
